### **DETAILED ACTION**

This is a response to an RCE filed on December 8, 2008.

Claims 1, 5-7, 10-12, 14-16, and 18-26 are currently pending.

#### ***Response to Arguments***

Applicant's arguments, see Remarks and Amendments, filed December 8, 2008, have been fully considered and are persuasive. The rejection of claims 1, 5-7, 10-12, 14-16, and 18-26 have been withdrawn.

#### **EXAMINER'S AMENDMENT**

The application has been amended as follows:

In claim 7, line 4, after "but not the sequence" delete "control".

This amendment is necessitated to avoid improper antecedent basis issues

#### ***Allowable Subject Matter***

Claims 1, 5-7, 10-12, 14-16, and 18-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The Applicant's invention is directed to a method and system of improving security of a wireless local area network operating under a standard protocol. Claim 7 is exemplary and other claims include limitations where generating a message integrity code (MIC) using a fragment number, but not a sequence number, improves timing requirements that enable generating the MIC before the sequence number has been assigned to a packet. The IEEE 802.11 released in 1999, in view of Shu [US 7171493 B2], and Jakubowski [US 6128737] do not teach these limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
